ARLINGTON, VIRGINIA 22204-4502

April 2005

IN REPLY
REFER TO:

To Our Valued DITCO Customers:

As the Director of DISA's Procurement and Logistics Directorate, I am pleased to present the 2005 DISA Contracts Guide. This Guide has been updated to provide you with the most current list of contracts available from the Defense Information Technology Contracting Organization (DITCO).

The 2005 DISA Contracts Guide provides many diverse contracts for telecommunications and Information Technology services, systems, equipment and support that are available to you. Many are performance-based, flexible and easy to use. Our contract specialists can issue task orders/delivery orders for you or, in some cases, your own contracting officers can issue the task orders/delivery orders for you. Just look for "decentralized ordering" to locate the contracts that allow you to place and administer your own orders. Either way, you will receive the services you require quickly, efficiently and receive the best value solution.

As DISA moves into a new net-centric environment, our contracts will continue to transform to meet the ever-changing world of communications and information technology. To support the warfighter, DITCO awarded a European Enterprise Wireless contract that provides wireless products and services to our soldiers and airmen fighting for freedom in Southwest Asia. We are working on the recompetition of many of our very successful contract vehicles so that we can continue to provide the best value solutions to you.

If our current cadre of contracts does not meet your mission needs, DITCO can also negotiate a contract to meet your specific mission requirements. As our catalog of contract vehicles continues to grow, we recommend you visit our web site at <http://www.ditco.disa.mil/hq/contracts/index.asp> or visit our on-line 2005 Contracts Guide at <http://www.disa.mil/main/support/contracts/index.html>. These are excellent sources of information on our DITCO contract vehicles.

Please contact us for solutions to all of your telecommunications and Information Technology requirements. We look forward to helping you expeditiously meet your mission needs.

A handwritten signature in blue ink, reading "Evelyn M. Depalma", is positioned above the printed name.

EVELYN M. DEPALMA
Director, Procurement and Logistics/
Chief, Defense Information Technology

Defense Information System Network (DISN)

Global Solutions (DGS) DCA200-02-D-5000 and 5001

The DISN DGS contracts provide life cycle support management for the DISN worldwide.

What can the contracts be used for?

Program management
Cost/schedule management
Financial management
Systems engineering
Hardware and software management
Test and evaluation
Manufacturing, engineering and/or logistics support
Network information services
Network management and control CONUS and OCONUS
Installation/maintenance for asynchronous transfer mode (ATM) protocol and Internet Protocol routers worldwide
Augmentation of CONUS Regional Network Operations and Security Center
Asynchronous transfer mode (ATM) services -worldwide
Management information system (MIS) support
DISN Service Center (DSC) Circuit Implementation Team
Transition support services
Transmission Operations Management support
Defense Message System (DMS) Transition Hub (DTH) hardware maintenance
Integrated Digital Network Exchange (IDNX) maintenance and operations Management
DISN Training
Configuration management program management and access
DISN program management support
Digital Voice System (DVS) program support and operations center support

Who can use these contracts?

The Department of Defense, its authorized customers and other federal agencies.

What is the best process to use this contract?

Contact the contracting officer's representative (COR) at (703) 882-0787 or the contracting officer at (618) 229-9407.

Prime Contractors:

SETA Corp. (small business)
Science Applications International Corp. (SAIC) (large business)

Subcontractors:

There are several major subcontractors (large, small and small disadvantaged businesses); subcontractors can be added at the request of the prime contractors and are not limited to only one prime contractor.

ISN Network Management Support Services Global (DNMSS-G)

DCA200-99-D-5011 and 5015

The DNMSS-G contracts provide engineering, development, integration, acquisition, implementation, management and operation support at task order-specified locations of the Defense Information Infrastructure (DII) and other specified DISN transmission systems and their designated network management systems. There are two related contracts to support these services. The Network Engineering Contract (NEC) performs activities relating to the management, development, engineering, integration, deployment, operations and maintenance of designated transmission, switching, network and network management systems. The Associate Support Contract (ASC) provides specified program support relating to project management and operations, including planning, engineering and development of designated networks and related systems.

What can this contract be used for?

Defense Switched Network (DSN) system operations, engineering and management
DSN network implementation and planning
Advanced DSN Integrated Management Support System (ADIMSS) theater support
Advanced DRSN (Defense Red Switch Network) integrated
Management Support System ARDIMSS theater support
DSN/ DRSN network management operational support
DSN/ DRSN network management control software
Integrated Network Management System (INMS)
Development, integration and enhancement
Configuration management system development, support and maintenance

Who can use these contracts?

The Department of Defense and its authorized customers.

What is the best source to get information and materials?

Contact the Contracting Officer at (618) 229-9544 or contracting Officer's Representative (COR) at (703) 818-0343. Additional information can be found at <http://www.ditco.disa.mil/contracts/catalog.asp>.

Prime Contractors:

DNMSS-G/ NEC: DynCorp Information Systems LLC

DNMSS-G/ ASC: ARTEL Inc.

DISN Satellite Transmission Service-Global (DSTS-G)

DCA200- 01-D-5002 thru 5004

The Defense Information System Network (DISN) Satellite Transmission Service-Global (DSTS-G) contracts provide a full range of global fixed satellite bandwidth, earth terminals and related satellite-based business and enterprise services and solutions.

What can the contracts provide?

- Global fixed satellite bandwidth
- Bandwidth and service management
- Leased Earth terminal services
- Purchase Earth terminals
- Global on-site Earth terminal operation and maintenance
- Commercial teleport services
- U.S. and foreign bandwidth and terminal licenses and approval
- Terrestrial interconnection services to support satellite service
- Host nation agreement-negotiation support
- Systems engineering support
- First right of refusals and guaranteed reservations
- DISN common-user hub services
- Multiple location turnkey satellite systems

Who can use the contracts?

The Department of Defense, its authorized customers and other federal agencies.

What is the best source to get information and materials?

Go to <http://www.ditco.disa.mil/hq/contracts/dstsgchar.asp>.

What is the best process to use these contracts?

Submit Telecommunications Service Requests (DISA Circular 310-130-1) and/or a performance work statement. Additional contact information is available at the Web site above.

Prime Contractors:

- Arrowhead Space & Telecommunications Inc. (small disadvantaged business)
- ARTEL Inc. (small disadvantaged business)
- Spacelink International LLC (an ESSI Company) (small business)

Defense Information Systems Network (DISN) Transmission Services-Pacific (DTS-P)

This contract is a communications building block of the Global Information Grid. DTS-P provides one stop shopping with the contractor handling all foreign carrier and local exchange carrier coordination to connect any site in the Pacific (including Alaska) to any location in the world. DTS-P also covers South America and regions under the responsibility of U.S. Southern Command.

What can this contract be used for?

- Dedicated transmission
- Undersea cable leases
- Satellite communications
- Asynchronous transfer mode (ATM) services
- Encryption and timing
- Equipment installation and maintenance
- Network management and monitoring
- Provisioning and trouble ticketing
- Fiber-optic cable installation and maintenance training

Who can use this contract?

The Department of Defense, other federal agencies and U.S. allies.

What is the best source to get information and materials?

MCI WorldCom at (808) 541-0385, the Defense Information Technology Contracting Organization-Pacific (DITCO-PAC) at (808) 473-2514 ext 236, or <http://www.ditco.disa.mil/pac>.

What is the best process to use this contract?

Submit a request for service to DISA or contact DITCO-PAC using the above information.

Prime Contractor:

MCI WorldCom

Iridium Enhanced Mobile Satellite Service (EMSS)

DCA200-03-D-5004

The EMSS contract provides a full range of Iridium satellite and ancillary equipment to be used with Iridium satellite airtime service, for instance, the purchase of Iridium telephones, pagers, secure modules, ancillary equipment and active or inactive Subscriber Identification Modules (SIM) cards. Telephones can be used worldwide except for four countries: Hungary, Poland, North Korea and North Sri Lanka. With proper encryption loaded, one Iridium telephone to another Iridium telephone has Top Secret capability. An Iridium telephone also allows a Secret connection to a desktop telephone, and plans are underway to eventually provide a Top Secret capability. Lead times are seven to 14 days.

What can this contract be used for?

Iridium 9505-securable satellite telephones

Iridium-secure modules

SIM cards

Ancillary equipment (batteries, etc.)

Who can use these contracts?

The Department of Defense, authorized non-DoD customers and customers in Australia, the United Kingdom, Canada and New Zealand.

What is the best source to get information and materials?

Contact the contracting officer at (618) 229-9458. Or go to <http://www.ditco.disa.mil/contracts/catalog.asp>.

Prime Contractor:

General Dynamics Decision Systems Inc.

Europe Enterprise Wireless Services Contract

HC1021-05-D-2000

The Wireless Services Contract provides commercial global system for mobile (GSM) telephone services, wireless personal digital assistant (PDA) services, and other wireless services for all DITCO Europe customers throughout the U.S. European Command (USEUCOM) and the U.S. Central Command (USCENTCOM) areas of responsibility.

What can the contract be used for?

- Wireless equipment
- Wireless services and equipment
- Service to 119 countries that make up USCENTCOM and USEURCOM
- Local wireless service
- Wireless PDAs/service
- Long-term subscriptions
- Short-term rentals
- 24/7 customer service

Who can use this contract?

The Department of Defense, its authorized customers and other federal agencies in the 119 countries that make up USCENTCOM and USEURCOM.

What is the best process to use this contract?

Contact the DITCO-Europe contracting officer, at +(49) 6302 9227 30, or DSN 314-496-7151.

Delegation authority for ordering from the contract should be requested from the DITCO-Europe contracting officer, +(49) 6302 9227 30, or DSN 314-496-7151. Orders for Army commands in USEURCOM may be ordered via HQ, 5th Signal Command G4, Contract Management Division CMR 421APO, AE 09056, DSN 314-380-5324.

Prime Contractor:

Worldcell

Encore

DCA200-02-D-5005 thru 5014

The Encore contracts provide a full range of information technology solutions requiring connectivity, interface or interoperability within the Global Information Grid (GIG). Decentralized ordering is allowed.

What can this contract be used for?

Enterprise information technology policy and planning
Integrated solutions management
Performance benchmarking
Business process re-engineering
Requirements analysis
Market research and prototyping
Information and knowledge engineering
Custom application development
Product integration
Testing and evaluation
Licensing and support

Who can use this contract?

The Department of Defense and other federal agencies.

What is the best source to get information and materials?

Go to www.ditco.disa.mil/hq/contracts/encorchar.asp.

What is the best process to use this contract?

Task order guidelines at the above Web site reflect easy, step-by-step instructions and sample documents showing how to assemble a requirements package.

The Encore Task Order Guidelines is a comprehensive handbook of how to use the Encore contracts. The guidelines consist of a five chapter basic document with thirteen separate attachments to explain Encore and provide templates for assembling your requirements package.

External contracting agencies may place orders directly against this contract. A copy of the contract is available on the above Web site.

Prime Contractors:

Computer Sciences Corp. (CSC)
Electronic Data Systems (EDS) Corp.
Lockheed Martin Integrated Systems Inc.
Northrop Grumman Information Technology Systems
Northrop Grumman Mission Systems
Unisys, U.S. Government Group
Analytical Services Inc. (ASI)
Pragmatics Inc.
TranTech Inc.

Subcontractors:

More than 250

Global Enterprise Management Support

DCA200-02-D-5020 thru 5023

Global Enterprise Management Support (GEMS) contracts will provide program management services to DISA in support of the Global Information Grid.

What can this contract be used for?

Task order management
Information technology management support
Verification and validation of engineering solutions
Information technology services

Who can use this contract?

The Department of Defense and other federal agencies.

What is the best source to get information and materials?

Go to www.ditco.disa.mil/hq/contracts/gemschar.asp.

What is the best process to use this contract?

Task order guidelines at the above Web site reflect easy, step-by-step instructions and sample documents showing how to assemble a requirements package.

Prime Contractors:

Bloodworth Integrated Technology Inc.
Keylogic Systems Inc.
Pragmatics Inc.
Taylor-Oden Enterprises Inc.

Hawaii Information Transfer System (HITS)

DCA300-97-D-0002

The Hawaii Information Transfer System (HITS) contract provides end-to-end telecommunications services for all Department of Defense users and authorized agencies throughout the state of Hawaii. Services include data and telephone services right down to the customer's desktop or handset. HITS is a robust network with diverse routing, redundant switches and strong network management under DISA oversight. More than 28,000 users on 60 military installations throughout Hawaii use HITS for their telephone and network services.

What can this contract be used for?

- Dedicated transmission
- Switched voice (analog and digital)
- Pier-side communications (shiplines)
- Switched data
- Asynchronous transfer mode (ATM) services
- Integrated Services Digital Network (ISDN) services
- 24/7 military operator services
- Emergency 911
- Customer premise equipment installation and maintenance
- Network management and monitoring
- Automated provisioning and trouble ticketing
- Fiber-optic cable installation and maintenance training

Who can use this contract?

The Department of Defense, other federal agencies and U.S. allies.

What is the best source to get information and materials?

Contact AT&T HITS at (808) 659-1400, the Defense IT Contracting Organization-Pacific (DITCO-PAC) at (808) 473-2733, or go to <http://www.ditco.disa.mil/pac>.

What is the best process to use this contract?

Military customers should work through their local base communications officer to order services or contact DITCO-PAC at the above phone number or Web address.

Prime Contractor:

AT&T

Information Assurance

DCA200-00-D-5011 thru 5021

Information Assurance (I-ASSURE) contracts will provide solution-based engineering products, services and technical support to produce unified, fully integrated systems security solutions for the Department of Defense. Decentralized ordering is allowed.

What can this contract be used for?

Policy, planning, process, program and project management support
Standards, architecture, engineering and integration support
Solution fielding/installation and operations
Education, training, awareness, certification and accreditation
Information assurance support

Who can use this contract?

The Department of Defense and other federal agencies.

What is the best source to get information and materials?

Go to www.ditco.disa.mil/hq/contracts/iachar.asp.

What is the best process to use this contract?

Task order guidelines at the above Web site reflect easy, step-by-step instructions and sample documents showing how to assemble a requirements package. External contracting agencies may place orders directly against this contract. A copy of the contract is available at the above Web site.

Prime Contractors:

ACS Defense Inc.
Artel Inc.
Computer Sciences Corp.
Electronic Data Systems Corp.
Northrop Grumman Information Technology Inc.
Pragmatics Inc.
SAIC Technology Services Corp.
SRA Corp.
TASC Inc.
Veridian Information
DigitalNet Government Solutions LLC

International Maritime Satellite

DCA200-02-D-5024 through 5028

The International Maritime Satellite (INMARSAT) contracts provide a full range of mobile satellite telecommunications airtime service, equipment and maintenance.

What can these contracts be used for?

Secure and non-secure airtime services, mobile, maritime and aero INMARSAT areas

Equipment purchase and lease

Equipment maintenance and installation

Operational and maintenance training

Who can use these contracts?

The Department of Defense, its authorized customers and all federal agencies.

What is the best source to get information and materials?

Contact the contracting officer at (618) 229-9496. Also go to <http://www.ditco.disa.mil/contracts/catalog.asp>.

What is the best process to use these contracts?

Interested customers should submit their Telecommunications Service Requests in accordance with DISA Circular 310-130-1.

Prime Contractors:

AOS Inc.

Global Communications Solutions

Arrowhead Space and Telecommunications Inc.

ADC International

O’Gara Satellite Systems

Next Generation Engineering

DCA100-02-D-4003 thru 4009 and 4017

Next Generation (NexGen) Engineering contracts provide Information Technology engineering services, capabilities and enabling products supporting DISA, the Department of Defense and other federal agencies.

What can this contract be used for?

General services engineering
Information systems engineering
Network engineering
Security engineering
Systems engineering
Systems implementation
Information technology standards
Program management

Who can use this contract?

Department of Defense and other federal agencies.

What is the best source to get information and materials?

Go to <http://www.ditco.disa.mil/hq/contracts/nexgenlbchar.asp> (large business vendors) or <http://www.ditco.disa.mil/hq/contracts/nexgensbchar.asp> (small business vendors). Customers can also contact contracting officers at (703) 681-0923/ DSN 761, (703) 681-1250/ DSN 761 or (618) 229-9710/ DSN 779.

What is the best process to use this contract?

Task order guidelines at the above Web site reflect easy, step-by-step instructions and sample documents showing how to assemble a requirements package. Average processing time is 16 to 21 calendar days.

Prime Contractors:

Northrop Grumman Information Technology
Science Applications International Corp. (SAIC)
SRA International Inc.
Artel Inc.
Femme Comp Inc.
FGM Inc.
Pragmatics Inc.
AC Technologies

Pacific Theater Exercise Contract

DCA300-02-D-0002

The Pacific Theater Exercise contract (PACTEX II) provides services to plan, design and operate telecommunications networks and information technology systems for military exercises, simulations and training. The services connect sites in the Pacific to any location in the world. All contractor personnel have Secret clearances and can surge to support requirements for short periods of time (typically one month to a year).

What can this contract be used for?

- Computer equipment maintenance
- Networking
- Telecommunications
- Planning and analysis
- Detailed network design
- Education and training
- Operations support
- Engineering/scientific support
- Project management

Who can use this contract?

The Department of Defense and other federal agencies.

What is the best source to get information and materials?

Contact Getronics Government Solutions at (808) 266-2350 or go to <http://www.getronics.com>.

What is the best process to use this contract?

For assistance in developing task orders, contact the Defense Information Technology Contracting Organization-Pacific (DITCO-PAC) at (808) 473-2514 ext 236, or go to <http://www.ditco.disa.mil/pac>.

Prime Contractor:

Getronics Government Solutions

BEA Weblogic Application Server

HC1047-04-A-4000

The BEA WebLogic BPA covers the purchase of BEA WebLogic Application Servers, commercial products and warranty services to the uniform services defined as Army, Navy, Marines, Air Force and DISA (not to include other defense agencies (ODAs) and intelligence (intel) agencies). The BPA has significant price incentives and discounts over GSA Schedules and market prices. Decentralized ordering is allowed.

What can this contract be used for?

Premium and Advantage
WebLogic Portal
WebLogic Integration
WebLogic Platform
WebLogic Enterprise Security
Liquid data
Warranty/maintenance

Who can use this contract?

The Department of Defense.

What is the best source to get information and materials?

Customers can view the BPA at www.ditco.disa.mi/hq/contracts/beachar.asp.

What is the best process to use this contract?

Step-by-step instructions are available under the link “Ordering Instructions for Non-Telecom IT Requirements” at www.ditco.disa.mil/contracts/catalog.asp.

External contracting agencies may place orders directly against this BPA by viewing the above Web site or by sending an e-mail requesting a copy of the BPA to the above e-mail address.

Prime Contractor:

Merlin Technical Solutions

DISN Global Services

IDNX/PROMINA Companion Equipment (DICENET)

DCA200-01-A-5002

The Services IDNX/Promina Companion Equipment BPA provides Promina network hardware, software and maintenance through “NET.COM.” Promina remains the premier multi-service networking product in use by the Department of Defense. The Scream Service Creation Manager Platform provides state-of-the art broadband switching capability for Internet protocol (IP) and asynchronous transfer mode (ATM). Also available is the ShoutIP Open Telephony Platform, which transports voice over a packet infrastructure. The DICENET BPA supports new requirements, as well as total system upgrades.

What can this BPA be used for?

- Promina 100/200/400/800 chassis
- Promina OS SW
- Promina bus, processor and server cards
- IDNX-to-Promina upgrades
- Promina miscellaneous components
- Promina trunk modules
- Promina data modules
- Promina voice modules
- LAN/WAN exchange (LWX) modules
- Packet exchange (PX) interfaces
- PX spares
- Frame express (FRX) modules
- Primeswitch modules
- Network management software and documentation
- Maintenance, services, logistics and support
- ShoutIP Open Telephony Platform
- Scream Service Creation Manager Platform
- Ancillary open-market equipment

Who can use this contract?

Department of Defense and Department of Defense-sponsored agencies.

What is the best source to get information and materials?

Additional information can be found at <http://www.ditco.disa.mil/contracts/catalog.asp>.

Prime Contractor:

NET.COM (rated as small business for this BPA)

Enterprise Anti-Virus Software Contracts DCA100-02-C-4046 and 4049, DCA100-03-C-4011

The Enterprise Anti-Virus Software contracts provide the latest generations of anti-virus technologies and capabilities, including new protection for wireless or personal digital assistants, home and office firewalls, enhanced management/system administration tools, and global enterprise technical support. These licenses provide multi-layered protection with best-of-breed combinations from each vendor's products at the desktop, server, gateway and network levels. It is a fully funded and centrally purchased software enterprise license available for free download to all Department of Defense users who have a dot-mil Internet Protocol address.

Who can use these contracts?

All of the Department of Defense and its military academies
Department of Defense personnel within joint, NATO and coalition forces
Department of Defense contractors authorized to use government-furnished equipment
Coast Guard

What is the best source to get information and materials?

Contact the contracting officer's representative at (703) 607-6365/ DSN 327, or go to <http://www.don-imit.navy.mil/esi/>. For Department of Defense software downloads, go to <http://www.cert.mil>.

Prime Contractors:

Mantech Inc.
Northrop Grumman Information Technology (teamed with Symantec Corp.)
Government Technology Solutions Inc. (teamed with Trend Micro)

Internosis Inc. DCA200-03-A-5002

The Internosis BPA provides Microsoft subject matter experts to conduct technical assessments of collaboration and knowledge management related solutions and technologies. Decentralized ordering is allowed.

What can this BPA be used for?

Document management
Content migration
Portal solution
Collaborative workflow
Security
Operations
Development system
Code construction
User test and feedback
Pilot system deployment
User acceptance test
Knowledge transfer and user training

Who can use this contract?

The Department of Defense and all federal agencies.

What is the best source to get information and materials?

Customers should contact DITCO Scott directly at ditcoitreq@disa.mil.

What is the best process to use this contract?

Step-by-step instructions are available under the link "Ordering Instructions for Non-Telecom IT Requirements" at www.ditco.disa.mil/contracts/catalog.asp.

External contracting agencies may place orders directly against this BPA. Contact the above e-mail address for a copy of the BPA.

Prime Contractor:

Internosis Inc.

Mantech Integrated Data Systems

DCA200-03-A-5000

This BPA provides commercial off-the-shelf (COTS) software applications and support services that assist government acquisition teams in the efficient planning and execution of competitive source selections. Decentralized ordering is allowed.

What can this BPA be used for?

Source selection planning and execution through the use of source selection tool Decision Point.

Who can use this contract?

The Department of Defense and all federal agencies.

What is the best source to get information and materials?

Customers should contact DITCO Scott directly at ditcoitreq@disa.mil.

What is the best process to use this contract?

Step-by-step instructions are available under the link “Ordering Instructions for Non-Telecom IT Requirements” at www.ditco.disa.mil/contracts/catalog.asp.

External contracting agencies may place orders directly against this BPA. Contact the above e-mail address for a copy of the BPA.

Prime Contractor:

Mantech Integrated Data Systems

Marzik Inc.

DCA200-02-A-5014

The BPA provides hardware and software equipment in support of StorageTek products. Decentralized ordering is allowed.

What can this contract be used for?

Tape drive

Virtual tape systems

Tape media

Libraries

Disk subsystems

Network equipment

Software

Who can use this contract?

The Department of Defense and other federal agencies.

What is the best source to get information and materials?

Customers should contact DITCO Scott directly at ditcoitreq@disa.mil.

What is the best process to use this contract?

Step-by-step instructions are available under the link “Ordering Instructions for Non-Telecom IT Requirements” at www.ditco.disa.mil/contracts/catalog.asp.

External contracting agencies may place orders directly against this BPA by sending an email requesting a copy of the BPA to the above e-mail address.

Prime Contractor:

Marzik Inc.

Red Hat Linux Enterprise Software

HC103-04-A-5000

Red Hat Enterprise Linux is the premier operating system for open source computing. It is sold by annual subscription, runs on seven system architectures, and is certified by top enterprise software and hardware vendors. Decentralized ordering is allowed.

What can this contract be used for?

Enterprise Linux WS basic and standard software
Enterprise Linux ES standard software
Enterprise Linux AS standard and premium software
Global learning services
Global professional services
Global engineering services

Who can use this contract?

All Department of Defense agencies.

What is the best source to get information and materials?

Customers should contact DITCO Scott directly at ditcoitreq@disa.mil.

What is the best process to use this contract?

Step-by-step instructions are available under the link “Ordering Instructions for Non-Telecom IT Requirements” at www.ditco.disa.mil/contracts/catalog.asp.

External contracting agencies may place orders directly against this BPA by viewing the above Web site or by sending an e-mail requesting a copy of the BPA to the above e-mail address.

Prime Contractor:

DLT Solutions Inc.

Sun Support Total Enterprise Warranty (SSTEWS)

DCA200-02-A-5011

The SSTEWS BPA offers extended warranty, maintenance, education and professional services for all Sun Microsystems products. Decentralized ordering is allowed.

What can this contract be used for?

SunSpectrum Support Services

Platinum

Gold

Silver

Bronze

Hardware Only

Software Only Support Program (SWON)

SunClient

Sun Professional Services

Sun Educational Services

Dynamic Systems' Integration Services

Who can use this contract?

The Department of Defense and Coast Guard.

What is the best source to get information and materials?

Customers can view www.sstew.com or <http://www.ditco.disa.mil/hq/contracts/sstewchar.asp>.

What is the best process to use this contract?

Step-by-step instructions are available under the link "Ordering Instructions for Non-Telecom IT Requirements" at www.ditco.disa.mil/contracts/catalog.asp.

External contracting agencies may place orders directly against this BPA by viewing the above Web site or by sending an e-mail requesting a copy of the BPA to ditcoitreq@disa.mil.
